

Project Wild America Youth Ambassadors-Crew Positions

Jamestown's Wild America

As part of its ongoing efforts to better understand the natural history of our region and promote environmental literacy and stewardship, the Roger Tory Peterson Institute of Natural History is excited to carry out its Project Wild America (PWA) Youth Ambassador program in Jamestown NY for a third year. As part of this program, RTPI is recruiting interested area high school students as youth ambassadors and college students as ambassador leaders to represent Project Wild America in the Greater Jamestown area. These students will work alongside RTPI biologists investigating, monitoring and improving habitat for threatened species in the area and raising public awareness about our important natural resources, environmental challenges and opportunities.

Who are we looking for?

The Roger Tory Peterson Institute is seeking eight qualified, motivated high school students (junior/senior level, age 16 or older) to serve as crew members for the 2017 Project Wild America Youth Ambassador program. This year's program will take place during a 6-week period from June 27th through August 5th and requires a commitment of 28.5 hours per week. During that period, normal workdays will run Tuesday through Friday from 8:30am-3:00pm and Saturday from 8:30am-1:30pm; however, these hours are subject to change as some earlier mornings, evenings and additional weekend hours will be required for special events and surveys. Participants who successfully complete the entire project period will have the opportunity to work outdoors with a number of environmental professionals, develop a wide variety of valuable job-related skills within the conservation field, gain lots of knowledge regarding our local flora and fauna and be awarded a \$1,500 stipend paid in three installments (bi-weekly of \$500).

What do you get to do?

With supervision of PWA Crew Leaders and RTPI Conservation Staff, participants will regularly:

- Assist in ongoing and new studies on local invasive plants and animals, breeding birds, nesting turtles, aquatic macroinvertebrates, and various pollutants in order to gain an overall understanding of the ecology of the river system and other green spaces within the City of Jamestown.
- Enter collected data into relevant state and national databases.
- Assist in the early phases of the building and monitoring of an urban ecosystem as RTPI works with city officials to restore natural areas, improve wildlife habitat and deliver increased environmental services to the areas surrounding the Chadakoin River and Riverwalk system.
- Provide outreach to the local community. Communications will include but are not limited to:
 - Chance encounters with the public during river studies
 - Designing cell phone tours or other displays on the Riverwalk
 - Manning informational booths and leading activities at RTPI's Wild America Festival
 - Leading organized public presentations and walks
 - Creating and carrying out conservation-related activities for children

- Utilize various traditional (newspaper, radio) and social media outlets (Facebook, Twitter, and PWA website) to communicate progress throughout the duration of the program.

RTPI staff and project crew leaders will provide appropriate training in job skills and team cooperation, as well as in species identification, biological monitoring techniques and conservation practices throughout the program. In addition, RTPI will provide the necessary equipment to carry out project duties.

On select days during the summer the PWA Crew and Crew Leaders will explore other regional conservation projects and/or work with other conservation partner organizations to increase exposure to the variety of environmental careers that exist in our area and to gain a broad understanding of the region's tremendous natural history assets.

Who should apply?

If this project sounds fun and interesting and you feel that the following qualifications describe you, we want to hear from you!

- Mature
- Works well with others
- Creative and enthusiastic - willing to interact with the public
- Interest in the environment and/or (biological) sciences
- Able and willing to work outdoors in sometimes physically strenuous and uncomfortable conditions (mud, rain and bugs will happen at some point!)
- Good work ethic e.g. can be expected to come to work every day, on time, prepared to work and dressed appropriately

To apply

Please submit the attached **application form** with a copy of your **high school transcripts** and a **letter of recommendation from a teacher** to:

Elyse Henshaw, Conservation Technician
Roger Tory Peterson Institute
311 Curtis Street
Jamestown, New York 14701
Email: ehenshaw@rtpi.org
Tel.: 716-665-2473 ext. 231

Applications are due on Friday, June 2nd by 4pm
